

Paving the way for Better Journeys

with new sleepers and power rails. The new signalling system will also reduce your waiting time.

Bringing you safer and more reliable journeys

with refurbished escalators, platform screen doors and other facilities.

Bringing you smoother transitions

Bringing you more comfortable rides

with contemporary sub-systems, including air conditioning and interior, on new and upgraded trains.

Bringing you better connectivity

with the Thomson-East Coast Line from 2019, Rapid Transit System Link between Woodlands and Johor Bahru by 2024 and a full Circle Line Loop by 2025.

Bringing you greater convenience

with more features such as charging points, priority queues and barrier-free entrances.

Bringing you timely information

anytime, anywhere. Get real-time train arrival timings, train frequency indicators, and station specific information at your fingertips, via the SMRTConnect app.

Folding Instructions

- 1) Tear along perforations
- 2) Fold all sides and tabs inwards to form cube

We hope you will enjoy using this cable organiser.

SMRT Trains is working to renew the **North-South and East-West Lines (NSEWL)**, Singapore's oldest and most heavily utilised MRT lines.

The upgrading of these lines is a complex set of engineering projects. This is the first major upgrade for the lines since we started operations in 1987. With trains serving commuters around 20 hours every day, work crews optimise the remaining hours to maintain and renew the network.

Our multi-year, multi-project efforts will allow us to run more trains, carry more passengers and serve you better.
